ADVANCING EMERGENCY CARE
At ACEP, we develop educational products, programs, and online courses that improve learning outcomes by combining authoritative content written by respected authors with innovative, proven, and engaging applications that meet the diverse needs of today’s emergency physicians.
PEER IX for Residency Programs

JUST LAUNCHED!

Bring the power of PEER assessments to your residency training program with PEER IX for Residency Programs

Sign up your program, buy memberships for your residents and faculty (for $99 each seat,) then assign and monitor tests to augment your program curriculum.

The Features:

- Customizable automated testing schedules
- Test creation and assignment by EM Model category by “age modifier,” by acuity, and more
- Monitoring of individual completion of assigned tests and user engagement
- Comparison of scores to other PEER users and other PGYs
- Notifications of content updates
- Program-level accounts with multiple roles for users

AMERICAN COLLEGE OF EMERGENCY PHYSICIANS
Read • Learn • Apply
Since 1974
Published continually for 42 years. That’s how you get “closest to the boards.”

100% new content
All PEER IX questions and answer explanations are brand new.

It’s what you expect from PEER and more
All 20 categories of the EM Model, “weighted” as they’ll be on your board exam, plus “acuity” frames, peds, and geriatrics.
New: “Physician Tasks.”

Access to PEER VIII
Included for PEER VIII subscribers

Your CME Credits
You’ll be able to earn up to 150 AMA PRA Category 1 credits™ with your annual membership. Claim them as you go in quarter-hour increments. A gauge (like this one) will show you how many you’ve claimed.

One membership, one annual fee, on all your devices
Annual membership includes continual content updates and CME credit at no extra charge

Free to active military physicians: VA Professional Education Program: 48.5 CME

New! Interactive Features and Downloadable Content
Critical Decisions in Emergency Medicine — Improve your clinical expertise with ACEP’s official CME publication. Two new Critical Decisions lessons are published each month.

Orthopedic Emergencies — Get the latest in pediatric orthopedics; the rapid, high-yield orthopedic examination; and tricks of the trade focused on the shoulder, elbow, wrist, knee, ankle, and foot. Also includes injury pearls.

Cardiovascular — Stay abreast of cardiovascular advances with lectures on abdominal vascular emergencies, poisoning management, stimulant abuse, plus noninvasive measures.

Pediatrics — Coveted courses on pediatric trauma, airway and respiratory emergencies, critical care and resuscitation, infectious disease, congenital disorders, seizures and imaging.

Clinical Policy — Based on ACEP’s carefully researched clinical policies, these activities cover procedural sedation, pulmonary embolism, ischemic stroke and prescribing of opioids.

Innovations in Patient Safety — Learn the innovative efforts for ED care at the-time-of-care transitions with eight courses.

Critical Care — Learn the principles of critical care and critical timing requirements in the ED, noninvasive methods for monitoring critical ED patients, reading a trauma CT, plus lifesaving skills.

Procedures Consult — Review the different approaches for arthrocentesis to treat effusions, compartment syndrome, nerve blocks, fiberoptic intubation options, transvenous pacing and ECG findings.

Concussion Essentials — Free access to the best practices and approach to assess disposition of concussed patients in the ED. Made possible by the Emergency Medicine Foundation through a gift from the National Football League Foundation.

Procedures & Skills — Refresh your knowledge about procedures you don’t perform very often with 45 lectures, plus hear expert Dr. Amal Mattu talk about ECGs!

Reimbursement and Coding — Safeguard your financial success with five online courses covering RVUs, CPT codes, ICD-10 implementation and more.

Sepsis and Infectious Disease — Gain knowledge of sepsis presentations, infectious global hotspots, pathogens and disease, diagnosis and management of any acute presentation, pediatric infections and more.

Stroke — Training on the symptoms, diagnosis, management and complications of stroke; case studies, how to read a head CT, and questions to ask the potential stroke patient. Stroke and trauma packages also available.

Maintenance of Certification — Courses covering ABEM’s MOC Part IV activities; the handoff process, planning safer aftercare, and imaging in patients preventing medication error.

Trauma — Satisfy your trauma CME requirements with 24 trauma lectures and interactive transcripts. Learn about new advances in trauma care, pediatric abuse, geriatric injuries, safe sedation practices, REBOA, and more.

Management — 50 learning modules covering financial issues, leadership, medical-legal risk management, operations and patient flow, patient relations, quality, safety and improvement, and more.

Ultrasound — Learn about buying and maintaining equipment, credentialing and privileging, reimbursement, continuing education and accreditation.

Neurologic — An overview of the symptoms, clinical presentation, historical factors, disease mechanisms, diagnostic approaches and treatment options of common neurological conditions.

Visual Diagnosis — Through perceptual learning, these 15 lectures will help you learn the key distinctions between what is normal and abnormal, between the characteristics that set one condition apart from another, and how to extract meaningful clues to quickly make visual diagnosis.

Diverse Expert Educators | 850 Hours of Online Education
What should you do?
Find out with ACEP’s new “Check Your Knowledge” APLS Self-Assessment Test

How will you answer?
More important, how will you perform?

FIND OUT NOW — risk-free, pain-free, and simply free! Here’s how:

1. Go to www.acep.org/acepecme
2. Log in with your ACEP Username and Password
3. Click “Check Your Knowledge” APLS Self-Assessment Test in the “Activities” box
4. Follow the steps in the left navigation pane

We’ll give you 10 cases and one simple question to answer — What should you do? When you finish, you’ll get a score report. Then the next step is yours — buy the APLS course manual to study on your own, or buy the instructor’s toolkit and course manuals and use the content to help others improve their knowledge and skills.

It’s Free! Can you afford not to?
Find out if you’re ready — if you’re confident — to treat any pediatric patient who comes through the door — any critical condition, life-threatening injury, or something you’ve read about but never seen.
The advanced knowledge and skills necessary to assess and manage critically ill or injured children during the first hours in the ED. This inclusive teaching and learning system was developed by experts from AAP and ACEP. Each chapter is case based and covers the key elements of assessment, diagnosis, testing, treatment, and disposition. Use the APLS materials for independent study or to augment education.

Order 10 or more copies for only $84 each!

Bouncebacks! Pediatrics

Kevin Klauer DO, EJD, FACEP

*Bouncebacks! Pediatrics* encompasses 26 cases of children who were seen in the ED, discharged, and then ‘bounced back’ with a different diagnosis, sometimes reversible, sometimes life-ending. In keeping with the *Bouncebacks* tradition, all cases include the physician’s actual documentation and is followed by a discussion of the risk management/patient safety features of the initial encounter, either told by the book authors or the chapter author.

Strange and Schafermeyer’s Pediatric Emergency Medicine, 4th Ed.

Robert Schafermeyer, MD, FACEP, FAAP; Mitton, Tinerbein, MD, FRCP, FAAP, FAACT, FACMT, et al.

This text is fully updated, full-color, and highly illustrated. The symptom-based section on cardinal presentations in pediatric emergency medicine provides essential life-saving information. All chapters focus on practical, need-to-know information. Subsequent sections cover all categories of disease that presents in children on an urgent or emergent basis. Clear and concise chapters.

479929
CLEARANCE PRICE $125

2014/1,008 pages/8x10/Hardcover/McGraw-Hill

Symptom-Based Diagnosis in Pediatrics

Samir Shah, MD; Stephen Ludwig, MD

Featuring 19 chapters devoted to a common pediatric complaint. Within each chapter, five to eight case presentations teach the diagnostic approach to the symptom. The case presentations follow a consistent outline of history, physical examination, and course of illness, and are followed by discussion of the differential diagnosis, diagnosis incidence and epidemiology, clinical manifestations, diagnostic approach, and treatment.

The Color Atlas of Pediatrics

Richard P. Usatine, MD; Camille Sabelia, MD

More than 1,800 full-color photographs help you visually diagnose a wide variety of common and uncommon conditions and disorders spanning the entire pediatric spectrum. This superb collection of clinical images is supported by concise, evidence-based treatment recommendations presented in easy-to-apply bulleted text. Each chapter begins with a patient story that ties the photographs to real-life patients.

479950
CLEARANCE PRICE $62

2014/1,408 pages/8.5x11/Hardcover/McGraw-Hill
This new second edition adds an emphasis on lean operations, innovative approaches, operational and physical redesign, wireless technology, safety and security, designing for special populations, and design alternatives to achieve efficiency, effectiveness, and sound clinical practice.

27 new projects have been added to the expanded case studies section – all designed to solve specific problems and meet specific needs such as behavioral health, historic preservation, lean processing, “no wait,” overcrowding, physician-directed patient flow, privacy, surge capacity, threat mitigation, wayfinding, and more.

And we know what made the first edition a best-seller – so we brought it back! In the new edition, you’ll get updated perspectives on these key issues:

- Physician leadership – the role of the emergency physician in the design process and why you need to lead
- Steps in the design process
- Goal-setting and needs assessment – and space programming
- Selecting and working with consultants
- Putting the pieces together
- Planning for the future
- And how getting a new emergency department can be one of the most rewarding experiences of your career
- All the unique content you won’t find anywhere else – the design and construction process demystified with you in mind
Avoiding Common Errors in the Emergency Department, 2nd Ed.
Amal Mattu, MD, FACEP; Arien Channugam, MD; Stuart Swadron, MD, FACEP; et al.

In a conversational, easy-to-read style, Avoiding Common Errors in the Emergency Department, 2nd Edition, discusses 365 errors commonly made in the practice of emergency medicine and gives practical, easy-to-remember tips for avoiding these pitfalls. Chapters are brief and evidence-based, suitable for reading immediately before the start of a rotation, used for quick reference, or read daily over the course of one year for personal assessment and review.

Patients in these cases were not entirely mismanaged, however important “red flags” were missed or ignored. Cases are structured to provide high-learning impact: documentation of initial visits; expert commentary on evaluation and documentation from medical and risk management perspectives; final ED visits and national experts’ referenced discussions of appropriate ED approaches to diagnosis and management.

Emergency Care and the Public’s Health
Jesse Pines, MD, MBA, MSCE; Jameel Abulainen, MD, MPH; James Scott, MD; et al.

This text is dedicated to the ideas of cultural competency and diversity in emergency medicine with focus on quality of patient care. With the passage of the Affordable Care Act, particularly the Medicaid expansion, EDs across the United States are poised to care for an unprecedented number of underserved minorities.

Emergency Care and the Public’s Health explores the complex role of emergency care in the context of change and as an increasingly vital component of health care systems both within and outside the US. As U.S. health care systems undergo a period of transformative change, so too will emergency care.

Ethical Problems in Emergency Medicine
John J. Jesus, MD; Peter Rosen, MD, FACEP; James Adams, MD; Arthur R. Derse, MD; et al.

Designed to consolidate the relevant literature and the thoughts of professionals currently working in the field into a practical and accessible reference, each chapter begins with a real case that was encountered in an ED setting. Each case presentation is followed by a short discussion of the case, covering how to approach the ethical dilemmas associated with the case.
Hardwiring Flow: Systems and Processes for Seamless Patient Care
Thom Mayer, MD, FACEP; Kirk Jensen, MD, MBA, FACEP

This book delves into one of the most critical issues facing health care leaders today—patient flow—where patients spend exactly the right amount of time at every juncture in their journey through an organization. Organizations that master flow provide better care, reduce the likelihood of litigation, and retain the best possible talent.

Essential Emergency Procedures, 2nd Ed.
Kaushal Shah, MD; Chlimbwe Mason, MD

When seconds count, turn to the resource that provides easy-to-find, easy-to-follow guidelines for the essential procedures you’re likely to use in today’s ED. Delivering the information you need using a consistent, bulleted, outline format, so you can find what you’re looking for quickly and easily. Abundantly illustrated in full color, it guides you step by step through nearly 100 adult and pediatric procedures.

Emergency Medicine Procedures, 2nd Ed.
Eric Reichman, PhD, MD, FFAEM, FACEP

Going far beyond the scope of most other texts, this lavishly illustrated, expert-authored reference helps you master the clinical and technical skills required to perform the full range of procedures in an emergency or acute care setting. The techniques presented in these pages will dramatically expand your understanding of emergency medicine procedures and your ability to deliver positive patient outcomes.
