An Introduction to Clinical Emergency Medicine, 2nd Ed.

S. V. Mahadevan, MD, FACEP; Gus M. Garmel, MD, FACEP

A must-have resource. Guided by the patient's chief complaint, it presents a concise, methodical approach to patient evaluation, management, and problem solving. Approaches clinical problems as clinicians approach patients – without full knowledge of the final diagnosis. Includes new chapters on sepsis, bleeding, burns, neonatal, and alcohol-related and dental emergencies. Full-color chapters include photographs, ECGs and radiologic studies, detailed illustrations, and practical tables.

Behavioral Emergencies for the Emergency Physician

Leslie S. Zun, MD

This comprehensive, reference-based text goes behind diagnostics, providing practical input from physicians experienced with adult emergency psychiatric patients. This text covers the pre-hospital setting and advises on evidence-based practice. Sedation, restraint and seclusion are outlined. Potential dilemmas during treatment are discussed in detail along with the more challenging behavioral diagnoses such as malingering and personality disorders.

Save the Lives of Those Crashing Before Your Eyes

It's "the Winter's Book" you've heard so much about, and it covers the critical conditions you're managing in the emergency department. It was written for you – with the focus on the patients who are "crashing" before your eyes – the sickest of the sick.

Written by the experts in critical care emergency medicine, every chapter highlights "Key Points" and "Pearls," and many offer management algorithms for quick reference.

- **What physiologic possibilities should you consider immediately?**
- **What steps should you take – right now – to save the patient's life?**

Find the answers to these questions, and more, in *Emergency Department Resuscitation of the Critically Ill*.

Chapter 17: Intracerebral Hemorrhage

Chapters Cover:

- Shock
- Sepsis
- Post–cardiac arrest management
- Deadly arrhythmias
- Trauma
- Poisoning
- Asthma
- Difficult emergency delivery
- Fluid management
- Aortic catastrophes
- Resuscitation of critically ill neonates and older pediatric patients

► Get Chapter 3: *The Crashing Ventilated Patient* for FREE at bookstore.acep.org

Textbook of Urgent Care Medicine

Lee Resnick, MD, FACEP; John Shufeldt, MD,
FACEP

Textbook of Urgent Care Medicine is a practical "just the facts" approach to make your workday easier. The information that you need to know is presented in bulleted outlines, allowing you to move rapidly through the patient's treatment plan. Each chapter begins with the typical and sometimes atypical presentation and addresses a disease or condition commonly seen in urgent care medicine.

IMPROVE YOUR
INTERPRETATION SKILLS

Critical Images in Emergency Medicine

Earn
15 CME
Credits

Case-based,
in-depth review of
emergency imaging

Do you want to get better at reading head CTs in critical patients? How about ultrasound images? Radiographs, or abdominal or chest CTs? You can improve your interpretation skills right now with this ACEP case-based approach to interpreting diagnostic images. This self-assessment activity tests your interpretation skills and helps you get better with each case.

Written by award-winning author and feature editor, Joshua S. Broder, MD, FACEP, this collection of images from daily emergency medicine practice illustrates many of these challenges. You can review each image and case presentation, answer a question about the image or case, then turn the page (or swipe your iPad®) to see if you were correct, and why!

CRITICAL IMAGES IN EMERGENCY MEDICINE

QUESTION
1

A 70-year-old man presented with hypoxia, hypotension, and altered mental status.

Initial chest radiograph

Which of the following best describes this chest radiograph?

- A. It demonstrates mediastinal shift, indicating tension pneumothorax
- B. It demonstrates mediastinal shift, indicating volume loss
- C. It demonstrates pneumomediastinum, indicating mediastinitis
- D. It demonstrates tracheal deviation, indicating simple pneumothorax

CRITICAL IMAGES IN EMERGENCY MEDICINE

QUESTION
2

A 29-year-old man presented with abdominal pain after a blow to the left abdomen during a soccer game. He was hemodynamically normal, with a blood pressure of 120/80 and a pulse rate of 67.

This computed tomography (CT) scan demonstrates which of the following?

- A. hemoperitoneum and liver laceration
- B. hemoperitoneum and splenic laceration with active hemorrhage
- C. hemoperitoneum with no evident source
- D. pneumoperitoneum and bowel perforation

 American College of
Emergency Physicians®

ADVANCING EMERGENCY CARE 

Satisfy Your Requirements Today!

Critical Decisions In Emergency Medicine — Improve your clinical expertise with ACEP's official CME publication. Two new *Critical Decisions* lessons are published each month.

Cardiovascular — Stay abreast of cardiovascular advances with lectures on abdominal vascular emergencies, poisoning management, stimulant abuse, plus noninvasive measures.

Clinical Policy — Based on ACEP's carefully researched clinical policies, these activities cover procedural sedation, pulmonary embolism, early pregnancy, and prescribing of opioids.

Critical Care — Learn the principles of critical care and critical timing requirements in the ED, noninvasive methods for monitoring critical ED patients, reading a trauma CT, plus lifesaving skills.

Concussion Essentials — Free access to the best practices and approach to assess disposition of concussed patients in the ED. Made possible by the Emergency Medicine Foundation through a gift from the National Football League Foundation.

Disaster / EMS — learn what to do when faced with an active shooter, critical elements of a mass gathering medical plan, emergencies at 30,000 feet, EMS literature, and more.

Imaging — Covering courses on ED diagnostic imaging and related issues; imaging in eye emergencies, neuro presentations, abdominal pain in children, and more.

Ethics — Three lectures covering family presence during procedures and resuscitation, responsibilities and liabilities when providing care outside the ED, and what we can learn from patients.

Maintenance of Certification — Nine courses covering ABEM MOC Part IV activities; certification, the handoff process, planning safer and more effective aftercare, and imaging inpatients with mild traumatic brain injury.

Management — 50 learning modules covering financial issues, leadership, medical-legal risk management, operations and patient flow, patient relations, quality, safety and improvement, and more.

Neurologic — An overview of the symptoms, clinical presentation, historical factors, disease mechanisms, diagnostic approaches and treatment options of common neurological conditions.

Orthopedic Emergencies — Provides the latest in pediatric orthopedics; the rapid, high-yield orthopedic examination; and tricks of the trade focused on the shoulder, elbow, wrist, knee, ankle, and foot. Also includes injury pearls.

Pediatrics — Coveted courses on pediatric trauma, airway and respiratory emergencies, critical care and resuscitation, infectious disease, congenital disorders, seizures, and imaging.

Innovations in Patient Safety — Learn the innovative efforts for ED care at the-time-of-care transitions with eight courses.

Procedures Consult — Review the different approaches for arthrocentesis to treat effusions, compartment syndrome, nerve blocks, fiberoptic intubation options, transvenous pacing and ECG findings.

Procedures & Skills — Refresh your knowledge about procedures you don't perform very often with 45 lectures, plus hear expert Dr. Amal Mattu talk about ECGs!

Reimbursement and Coding — Safeguard your financial success with five online courses covering RVUs, CPT codes, ICD-10 implementation, and more.

Sepsis and Infectious Disease — Gain knowledge of sepsis presentations, infectious global hotspots, pathogens and disease, diagnosis and management of any acute presentation, pediatric infections, and more.

Stroke — Training on the symptoms, diagnosis, management and complications of stroke; case studies, how to read a head CT, and questions to ask the potential stroke patient plus new interactive transcripts!

Trauma — Satisfy your trauma CME requirements with 24 trauma lectures and interactive transcripts. Learn about new advances in trauma care, pediatric abuse, geriatric injuries, safe sedation practices, REBOA, and more.

Ultrasound — Learn about buying and maintaining equipment, credentialing and privileging, reimbursement, continuing education and accreditation.

Visual Diagnosis — Through perceptual learning, these 15 lectures will help you learn the key distinctions between what is normal and abnormal, between the characteristics that set one condition apart from another, and how to extract the most meaningful set of clues to quickly make visual diagnosis.

Case Studies in Pediatric Emergency and Critical Care Ultrasound

David J. McLario, DO; John L. Kendall, MD

Case Studies in Pediatric Emergency and Critical Care Ultrasound illustrates the utility of bedside ultrasound in a variety of scenarios, including the ED and critical care unit. A wide range of diagnostic and procedural applications are covered in 59 cases, recreating real-life experiences of expert practitioners. The teaching points highlight how ultrasound can be used to expedite and focus pediatric care. Includes hundreds of high-quality images, and video content.

Bouncebacks! Pediatrics

Kevin Klauer DO, EJD, FACEP

Bouncebacks! Pediatrics encompasses 28 cases of children who were seen in the ED, discharged, and then 'bounced back' with a different diagnosis, sometimes reversible, sometimes life-ending. In keeping with the *Bouncebacks!* tradition, all cases include the physician's actual documentation and is followed by a discussion of the risk management/patient safety features of the initial encounter, either told by the book authors or the chapter author.

SECOND EDITION

Emergency Department Design

A Practical Guide to Planning for the Future

NEW!

Jon Huddy AIA

With 27 new case studies edited by

James Lennon AIA

Michael Pietrzak MD

David Vincent AIA ACHA LEED AP

Tracy Sanson MD FACEP

Editor

This new second edition adds an emphasis on lean operations, innovative approaches, operational and physical redesign, wireless technology, safety and security, designing for special populations, and design alternatives to achieve efficiency, effectiveness, and sound clinical practice.

27 new projects have been added to the expanded case studies section – all designed to solve specific problems and meet specific needs such as behavioral health, historic preservation, lean processing, “no wait,” overcrowding, physician-directed patient flow, privacy, surge capacity, threat mitigation, wayfinding, and more.

And we know what made the first edition a best-seller – so we brought it back! In the new edition, you’ll get updated perspectives on these key issues:

- Physician leadership – the role of the emergency physician in the design process and why you need to lead
- Steps in the design process
- Goal-setting and needs assessment – and space programming
- Selecting and working with consultants
- Putting the pieces together
- Planning for the future
- And how getting a new emergency department can be one of the most rewarding experiences of your career
- All the unique content you won’t find anywhere else – the design and construction process demystified with you in mind
