Adult Emergency Medicine: Self-Assessment Color Review

John O'Brien, MD

Covers all aspects of adult emergency medicine, 250 cases are presented randomly to reflect real-life practice. Each case consists of one or more questions, illustrated by stimulating visual material including clinical photographs, imaging and electrocardiograms. Answers and full discussion then follow covering differential and definitive diagnoses, management and subtle insights to provide optimal care and prevent complications.

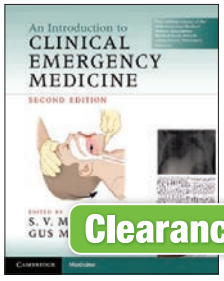
2012/256 pages/8.5x11/Softcover/CRC Press



An Introduction to Clinical Emergency Medicine, 2nd Ed.

S. V. Mahadevan, MD, FACEP; Gus M. Garmel, MD, FACEP

A must-have resource. Guided by the patient's chief complaint, it presents a concise, methodical approach to patient evaluation, management, and problem solving. Approaches clinical problems as clinicians approach patients – without full knowledge of the final diagnosis. Includes new chapters on sepsis, bleeding, burns, neonatal, and alcohol-related and dental emergencies. Full-color chapters include photographs, ECGs and radiologic studies, detailed illustrations, and practical tables.

Behavioral Emergencies for the Emergency Physician

Leslie S. Zun, MD

This comprehensive, reference-based text goes behind diagnostics, providing practical input from physicians experienced with adult emergency psychiatric patients. This text covers the pre-hospital setting and advises on evidence-based practice. Sedation, restraint and seclusion are outlined. Potential dilemmas during treatment are discussed in detail along with the more challenging behavioral diagnoses such as malingering and personality disorders.

Save the Lives of Those Crashing Before Your Eyes

It's "the Winter's Book" you've heard so much about, and it covers the critical conditions you're managing in the emergency department. It was written for you – with the focus on the patients who are "crashing" before your eyes – the sickest of the sick.

Written by the experts in critical care emergency medicine, every chapter highlights "Key Points" and "Pearls," and many offer management algorithms for quick reference.

- **What physiologic possibilities should you consider immediately?**
- **What steps should you take – right now – to save the patient's life?**

Find the answers to these questions, and more, in *Emergency Department Resuscitation of the Critically Ill*.

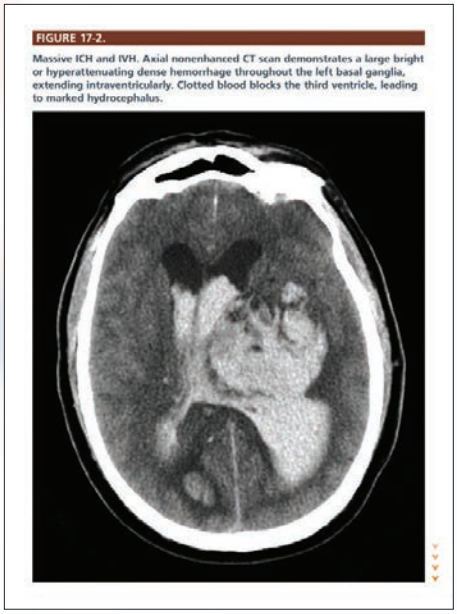

FIGURE 17-2.
Massive ICH and IVH. Axial nonenhanced CT scan demonstrates a large bright or hyperattenuating dense hemorrhage throughout the left basal ganglia, extending intraventricularly. Clotted blood blocks the third ventricle, leading to marked hydrocephalus.

Chapter 17: *Intracerebral Hemorrhage*

Chapters Cover:

- Shock
- Sepsis
- Post–cardiac arrest management
- Deadly arrhythmias
- Trauma
- Poisoning
- Asthma
- Difficult emergency delivery
- Fluid management
- Aortic catastrophes
- Resuscitation of critically ill neonates and older pediatric patients

▸ Get Chapter 3: *The Crashing Ventilated Patient* for FREE at **bookstore.acep.org**

Textbook of Urgent Care Medicine

Lee Resnick, MD, FACEP; John Shufeldt, MD, FACEP

Textbook of Urgent Care Medicine is a practical "just the facts" approach to make your workday easier. The information that you need to know is presented in bulleted outlines, allowing you to move rapidly through the patient's treatment plan. Each chapter begins with the typical and sometimes atypical presentation and addresses a disease or condition commonly seen in urgent care medicine.

Study 60 Real-life Cases

IMPROVE YOUR INTERPRETATION SKILLS

Critical Images in Emergency Medicine

Earn 15 CME Credits

Case-based, in-depth review of emergency imaging

Do you want to get better at reading head CTs in critical patients? How about ultrasound images? Radiographs, or abdominal or chest CTs? You can improve your interpretation skills right now with this ACEP case-based approach to interpreting diagnostic images. This self-assessment activity tests your interpretation skills and helps you get better with each case.

Written by award-winning author and feature editor, Joshua S. Broder, MD, FACEP, this collection of images from daily emergency medicine practice illustrates many of these challenges. You can review each image and case presentation, answer a question about the image or case, then turn the page (or swipe your iPad®) to see if you were correct, and why!

The Color Atlas of Pediatrics

Richard P. Usatine, MD; Camille Sabella, MD

More than 1,800 full-color photographs help you visually diagnose a wide variety of common and uncommon conditions and disorders spanning the entire pediatric spectrum. This superb collection of clinical images is supported by concise, evidence-based treatment recommendations presented in easy-to-apply bulleted text. Each chapter begins with a patient story that ties the photographs to real-life patients.

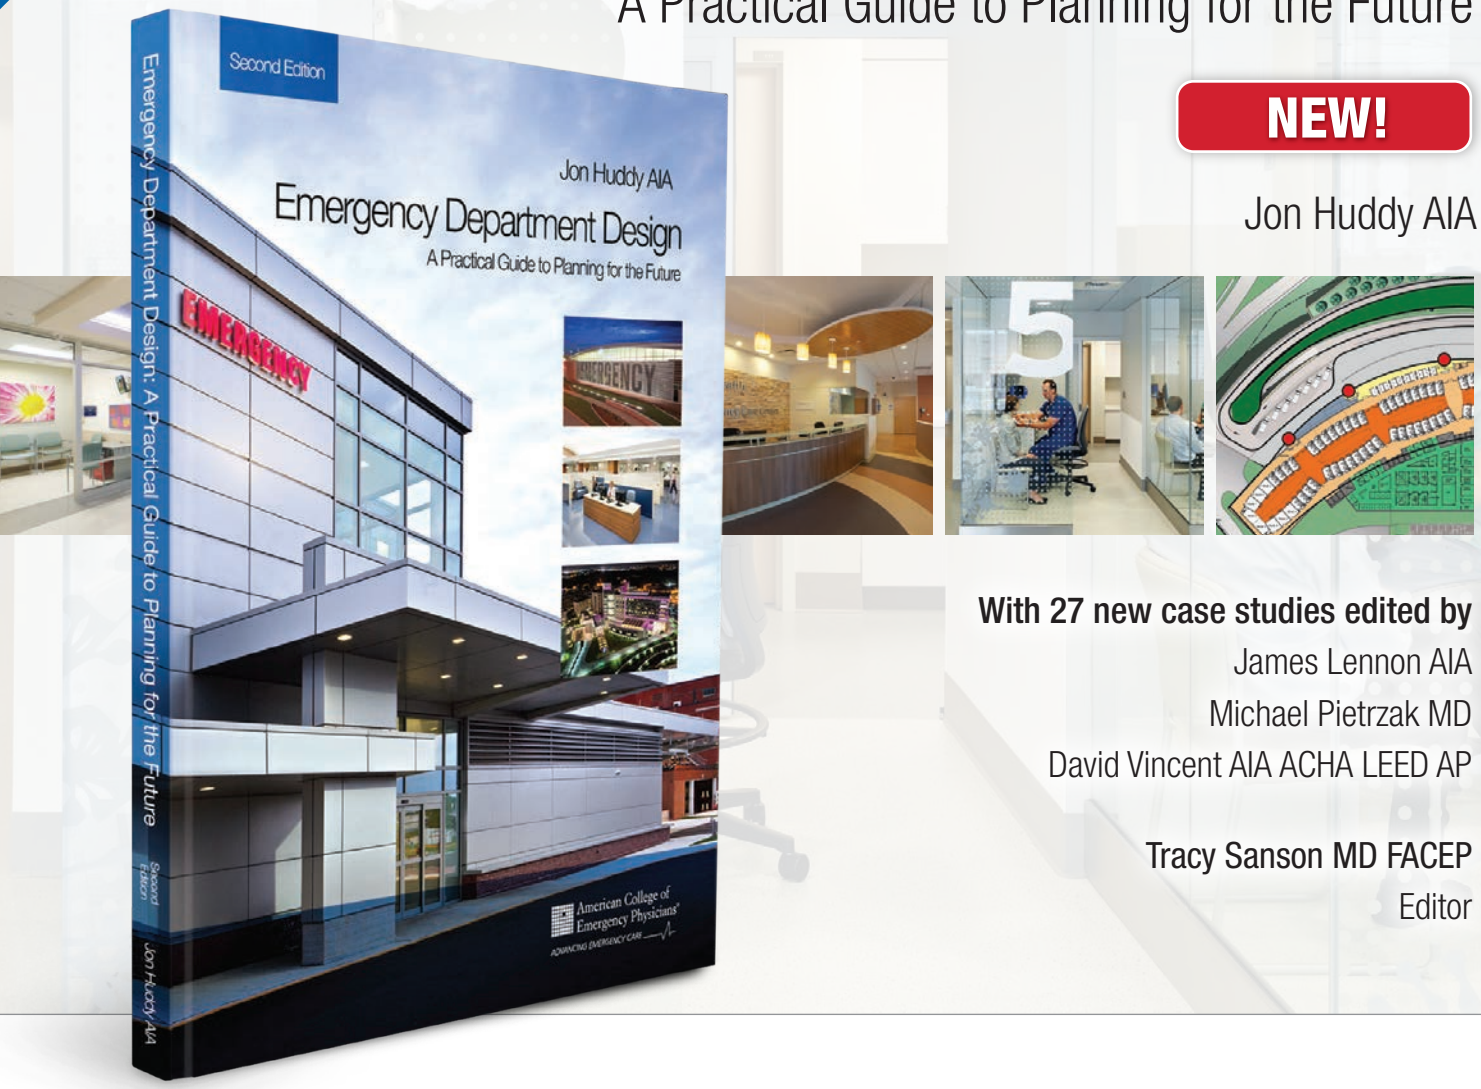
SECOND EDITION

Emergency Department Design

A Practical Guide to Planning for the Future



NEW!

Jon Huddy AIA

With 27 new case studies edited by

James Lennon AIA

Michael Pietrzak MD

David Vincent AIA ACHA LEED AP

Tracy Sanson MD FACEP

Editor

This new second edition adds an emphasis on lean operations, innovative approaches, operational and physical redesign, wireless technology, safety and security, designing for special populations, and design alternatives to achieve efficiency, effectiveness, and sound clinical practice.

27 new projects have been added to the expanded case studies section – all designed to solve specific problems and meet specific needs, such as behavioral health, historic preservation, lean processing, "no wait," overcrowding, physician-directed patient flow, privacy, surge capacity, threat mitigation, wayfinding, and more.

American College of Emergency Physicians®

ADVANCING EMERGENCY CARE

And we know what made the first edition a best-seller – so we brought it back! In the new edition, you'll get updated perspectives on these key issues:

- Physician leadership – the role of the emergency physician in the design process and why you need to lead
- Steps in the design process
- Goal-setting and needs assessment – and space programming
- Selecting and working with consultants
- Putting the pieces together
- Planning for the future
- And how getting a new emergency department can be one of the most rewarding experiences of your career
- All the unique content you won't find anywhere else – the design and construction process demystified with you in mind

Avoiding Common Errors in the Emergency Department

Amal Mattu, MD, FACEP; Ariun Chanmugam, MD; Stuart Swadron, MD, FACEP; et al

Describes in short, clinical scenarios 400 errors commonly made in the ED, and gives practical, easy-to-remember tips for avoiding these pitfalls. Also includes sections on nonclinical aspects of emergency medicine practice, such as proper documentation, communication and interactions with consultants and lawyers.

Bouncebacks! Emergency Department Cases: ED Returns

Michael B. Weinstock, MD; Ryan Longstreth, MD; Gregory L. Henry, MD, FACEP

Patients in these cases were not entirely mismanaged, however important "red flags" were missed or ignored. Cases are structured to provide high-learning impact: documentation of initial visits; expert commentary on evaluation and documentation from medical and risk management perspectives; final ED visits, diagnosis and hospital/surgical courses; and national experts' referenced discussions of appropriate ED approaches to diagnosis and management.

Director's Corner Lessons in EM Leadership & Management

Michael Silverman, MD; Robert Strauss, MD

Director's Corner raises and responds to a spectrum of questions concerning poignant topics of leadership and management in the ED. The book is divided into five sections, including sections on the always-troubling human resources issues, the ubiquitous clinical and operational problems, and the rarely addressed issue of professional growth.

Emergency Care and the Public's Health

Jesse Pines, MD, MBA, MSCE; Jameel Abualenain, MD, MPH; James Scott, MD; et al.

Emergency Care and the Public's Health explores the complex role of emergency care in the context of change and as an increasingly vital component of health care systems both within and outside the US. As U.S. health care systems undergo a period of transformative change, so too will emergency care.

Ethical Problems in Emergency Medicine

John Jesus, MD; Peter Rosen, MD, FACEP; James Adams, MD; Arthur R. Derse, MD; et al.

Designed to consolidate the relevant literature and the thoughts of professionals currently working in the field into a practical and accessible reference, each chapter begins with a real case that was encountered in an ED setting. Each case presentation is followed by a short discussion of the case, covering how to approach the ethical dilemmas associated with the case.

Hardwiring Flow: Systems and Processes for Seamless Patient Care

Thom Mayer, MD, FACEP; Kirk Jensen, MD, MBA, FACEP

This book delves into one of the most critical issues facing health care leaders today—patient flow—where patients spend exactly the right amount of time at every juncture in their journey through an organization. Organizations that master flow provide better care, reduce the likelihood of litigation, and retain the best possible talent.

How to Survive a Medical Malpractice Lawsuit

Ilene R. Brenner, MD

Getting sued for medical malpractice is one of the most traumatic events of a physician's career. This text guides physicians through the process from the moment they receive a summons until the after-trial appeal process. Contains valuable information to prevent making critical mistakes that can hurt your case. Strategies explained maximize chances of a defendant's verdict. Includes vital information on how to change your attorney and act at the deposition.

The Patient Flow Advantage

Kirk Jensen, MD, MBA, FACEP;
Thom Mayer, MD, FACEP, FAAP

How will your organization survive and thrive with the shift from volume to value? In healthcare, change used to be less frequent. But today, each of us works in a capacity-constrained environment where change is constant and patient volume is ever increasing. Flow matters. In fact, it's non-negotiable. This book includes specific tips, tools, and techniques to add value and eliminate waste.
